EX50Li Now Compatible with Makita XGT® 40V 8Ah Batteries

The new addition to the EX50Li (40V) lineup was designed to provide exceptional performance and flexibility, ensuring operators and first responders get the most out of their existing equipment. With the compatibility of Makita 40V max XGT® 8Ah battery packs, our powerful fans now seamlessly integrate into existing toolkits, enhancing operation efficiency and convenience.

NEW Makita version packed with the same features as the EX50Li (40V) gold standard

Battery packs are hot-swappable, but two are recommended for up to 45 minutes of runtime at 100%. All BrushlessPPV fans including the Makita model are equipped with industry-first features:

- **Rollover Protection System (ROPS):** Prioritizing user safety, our fan now automatically and instantaneously shuts down in the case of falls.
- **Low-voltage warning:** To improve situational awareness, the integrated scene lights are now programmed to indicate when batteries have low runtime remaining.
- **Upgraded frame:** Our heavy-duty frame has been optimized for performance and cable management, making each model of the BrushlessPPV lineup the ultimate mission-fit PPV fan.

We are committed to providing our customers with top-quality products that enhance productivity and make work safer and easier. The RAMFAN BrushlessPPV lineup and 40V fan with Makita compatibility is a testament to our dedication to innovation and customer satisfaction. We look forward to bringing you more cutting-edge solutions.

Product:

RAMFAN BrushlessPPV 40V_{DC}

Model:

EX50Li 40V_{DC} Makita

Part numbers:

EL5540MK (115 V_{AC})

EL5540MKCE (230 V_{AC})

Availability:

In production and available for shipment as of this publication
