## EX550 (400V<sub>DC</sub> BrushlessPPV™)

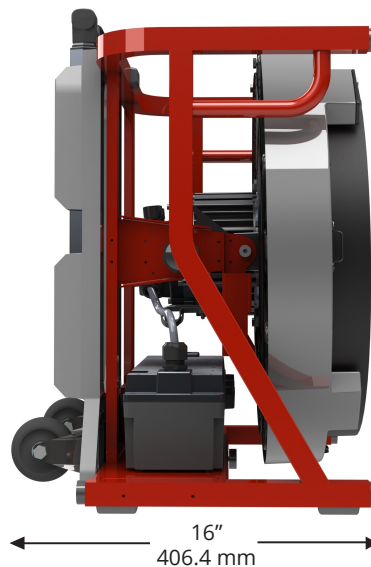

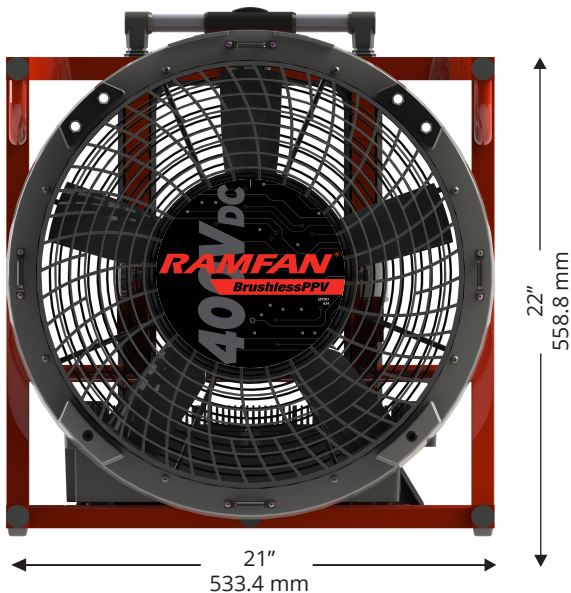

The EX550 is capable of producing 3.2 hp from standard 120/240 V<sub>AC</sub> supply due to its 400 V<sub>DC</sub> BrushlessPPV motor, with no peak inrush current to blow circuit breakers. Now available with rugged all-terrain wheels, the EX550 is more mobile than ever, making it easy to transport across any surface, whether rough outdoor terrain or uneven indoor floors.

This fan revolutionizes the PPV category at only 58 lbs, with an output of 14,000 cfm, and a footprint similar to the EX50Li battery fan! A true game-changer for fire departments employing ventilation tactics in larger structures where only gas-powered PPV fans could do the work before.

For remote or off-grid operations The EX550 is compatible with the Instagrid GO or ONE Max portable power generators. Visit [www.krakenpower.com](http://www.krakenpower.com) to learn more.
